Bachelor of Engineering in Information Technology

A third-year IT student with a passion for problem-solving and developing innovative solutions. I have a strong foundation in creating dynamic and responsive web applications. Eager to bring my skills in web development and continuous learning to contribute to impactful projects at your company.

PROJECTS

SwiftFix (React, Tailwind)

[Link](#)

SwiftFix is a home service platform developed using React and Tailwind CSS, offering a seamless solution for accessing multiple services. It features 24/7 chatbot support, multilingual capabilities, and a subscription-based model with flexible plans. SwiftFix ensures service provider background checks and offers both service seekers and providers an easy-to-use interface, competitive rates, and job flexibility. Services include plumbing, carpentry, cleaning, and more, with additional offerings like babysitting and elder care.

Salesforce Website (HTML, CSS)

[Link](#)

Developed a complete static website for a Salesforce platform, focusing on clean, professional design and easy navigation. Utilized HTML for structuring content and CSS for styling and layout, ensuring cross-browser compatibility and a cohesive visual design. Strengthened understanding of web design principles, improved skills in writing clean and maintainable HTML/CSS code, and learned the importance of creating visually appealing and accessible web pages..

CareMate (React, Tailwind CSS)

[Link](#)

CareMate is a user-friendly platform designed to provide remote assistance for elderly care. Key features include a Caregiver Marketplace for finding and hiring caregivers, Daily Reminders for tasks like medication and appointments, Appointment Management to organize visits and sessions, a Chatbot for real-time support, and Multilingual Support for diverse users. The goal of CareMate is to meet the growing demand for elderly care services while offering a sustainable solution that benefits both caregivers and users.

BookTraker (JAVA , MYSQL)

[Link](#)

A library management system designed to automate library processes and eliminate manual paperwork. Features include book and student information management, along with an automatic fee calculation based on late return dates. Developed using Java Swing and SQL for a user-friendly and efficient library experience.
